Multi-User License Extension for ARM 8 Software for a Privately Funded Company

Purpose: You must execute this license agreement *before* installing ARM on any computer used by a person who is *not the ARM license holder*.

The standard ARM License Agreement allows Licensee to personally use ARM software on a maximum of two (2) computers provided the software is used only on one (1) computer at a time. *One (1) software package and standard license may not be loaded on multiple computers or a computer server, or used in multiple locations.*

With this License Extension, Gyilling Data Management, Inc. (GDM) permits the ARM Licensee in a Privately Funded Company whose signature is affixed on page 2 to install the ARM serial number listed on page 2 on *no more than two (2) additional computers at same location as the ARM Licensee for use by persons who are not ARM Licensees.*

This License Extension is granted under the following conditions:

Additional ARM licenses are required for employees who do not qualify, or exceed the following conditions.

**Place a check mark in every box below to verify that each statement is true.
All six (6) conditions below must be met by all persons included in this License Extension.**

Anyone who does not qualify for all items below, or whose job description is not listed, must purchase a separate ARM License to legitimately use ARM.

1. Each proposed additional ARM user under this License Extension is **not a Researcher or Study Director**, because each Researcher or Study Director must have his/her own separate ARM license.
2. Every person using ARM is at the same office location as the ARM Licensee.
3. ARM is installed only on computers that are company property, or personal property of ARM Licensee.
4. Every person using ARM is directly supervised by the ARM Licensee or his/her designate.
5. Every person using ARM is employed by the same organization as Licensee.
6. The primary job description of each person covered under this Licensee Extension is **Technician, Secretary, or Temporary employee** (or someone with a similar job description).

Jobs description of persons who qualify for a license extension:

Technician performs tasks at a trial site on behalf of a researcher, usually under direct guidance of the researcher: help marking plots, help during trial preparation, help during application and assessments or exceptionally apply and assess on behalf of the researcher. "Under direct guidance" means that the technician for example is not entitled to decide on changing of plot size in the field or on specific maintenance activities, he is not going to discuss with the land owner/farmer what the farmer can do across the trial site.

Secretary typically gives administrative support to the researcher/study director. With regard to ARM typical tasks are data entry from data captured in the field on paper, printing reports using report sets defined by the study director/researcher.

Temporary employee typically performs the tasks described for Technician and Secretary staff in order to handle workload peaks, and will use ARM a maximum of 6 months per year.

Complete information on next page, sign, and return to GDM.

This agreement is made as of the date executed by both parties between the Licensor Gylling Data Management, Inc. (GDM), 405 Martin Boulevard, Brookings, SD 57006 USA and the ARM Licensee listed below. By installing this ARM software onto additional computers not authorized by the standard ARM License Agreement, Licensee agrees to be bound by the terms of this License Extension. Licensor and Licensee agree as follows:

This License Extension applies only for the people listed below, who agree to comply with the License Extension.

	First License Extension	Second License Extension
Employee Name:		
Company:		
Job Title:		
Email address:		
Phone number:		
Address:		

The training of additional employees is the responsibility of the ARM Licensee, not GDM. The ARM Licensee has designated _____ as the **ARM Trainer** and may call GDM for additional assistance along with the ARM Licensee. It is the responsibility of the ARM Licensee to inform GDM any changes of the designated ARM Trainer.

When ARM is used by a person who is not the ARM Licensee, that person is expressly forbidden from retaining any ARM copy after terminating his/her work assignment with the ARM Licensee.

The term of this ARM License Extension begins on the date that the last signature is affixed below, and continues concurrent with the term of the existing ARM License.

Job description of persons who require their own personalized license to use ARM software

Study director (investigator) in the research company: The person responsible for organizing trial work within a research company. Typical tasks are distribution of trial work among the researchers, direct contact to the sponsor and final review of ARM files before sending them as a trial result to the sponsor.

Researcher (investigator) in the research company is person responsible for a trial. Typically the job of the researcher is identifying the trial site, keep contact to the landowner/farmer, deciding for the correct application timings as to the protocol, deciding on the assessment times if kept variable in the protocol. The researcher is going to answer any specific questions on the trial reports the study director cannot answer directly. The researcher is responsible for the correctness of data entry into ARM.
