

TABLE OF CONTENTS

1- INTRODUCTION

- 1.1. General introduction
- 1.2. Purpose
- 1.3. How to read this statistical guideline

2- SETTING THE TRIAL OBJECTIVES

- 2.1. Glossary
- 2.2. Defining the number of factor
- 2.3. Description of a level within a factor
- 2.4. Types of herbicide evaluations
- 2.5. Experimental conditions
 - 2.5.1. Soil Heterogeneity
 - 2.5.2. Practical constraints

3- SETTING UP THE APPROPRIATE EXPERIMENTAL DESIGN

- 3.1. Selection an Experimental Design type
- 3.2. Characteristics of the Experimental Designs
 - 3.2.1. Fully Randomised
 - 3.2.2. Random Complete Block (RCB)
 - 3.2.3. Latin Square
 - 3.2.4. Factorial Design
 - 3.2.5. Split-Plot
 - 3.2.6. Criss-Cross or Strip-Plot
- 3.3. Number of Replications / Number of Blocks.
 - 3.3.1. Blocking.
 - 3.3.2. Prerequisites.
 - 3.3.3. Estimation of the number of replicates.
 - 3.3.4. Number of treatments and replicates in relation to "degrees of freedom"
 - 3.3.5. Minimum required replicates by type of Experimental Design.
- 3.4. Randomization and allocation of the plots.
 - 3.4.1. Purpose.
 - 3.4.2. Guidelines.
- 3.5. Layout of the plots in relation to crop.
- 3.6. Untreated Plots.
 - 3.6.1. Purpose.
 - 3.6.2. Types of control arrangements
 - 3.6.3. Selection of the type of untreated control arrangement
- 3.7. Trial Series.
 - 3.7.1. Single trial versus Trial Series
 - 3.7.2. Planning trial series.

4- ASSESSING THE TRIAL RESULTS

- 4.1. Reliability of the Trial
- 4.2. Nature of the variables
- 4.3. Transformation of variables: How to select
- 4.4. Missing data

5. STATISTICAL ANALYSIS

- 5.1. Choice of the method of analysis
- 5.2. Analysis of Variance [AOV].
 - 5.2.1. Principles.
 - 5.2.2. Assumptions Underlying the Analysis of Variance
 - 5.2.3. Analysis of Variance results [Outputs]
 - 5.2.4. Analysis of Variance for other types of Designs

6- MULTIPLE COMPARISONS

- 6.1. Decision errors⁴
- 6.2. Selection of Multiple Comparison
- 6.3. Setting the significance level of a test
- 6.4. Examples⁵⁶

7- ADVANCED ARM TOPICS

- 7.1. Dose Response Analysis
- 7.2. Area Under Disease Pressure Curve (AUDPC)
 - 7.2.1 Measuring Plant Disease - AUDPC with an ARM Example. 64
- 7.3. Control Correction Transformations
 - 7.3.1. Henderson-Tilton Transformation
 - 7.3.2. Abbott's Transformation
 - 7.3.3. Schneider-Orelli Transformation
 - 7.3.4. Control Corrections with ARM

APPENDIX

A1. - COMPARISONS INVOLVING TWO SAMPLE MEANS [TWO TREATMENTS]

- A 1.1. Independent samples comparisons - t- Test
- A 1.2. Paired samples comparisons - Paired t-Test
- A 1.3. Examples
- A 1.4. Paired versus independent comparisons.

A2. - NON PARAMETRIC STATISTICS. "DISTRIBUTION FREE" TESTS

- A2.1. Principles.
- A2.2. Choice of a test according the nature of variables
- A2.3. Chi-Squared Test - χ^2 ..Test
- A2.4. Most frequently encountered tests.
 - A2.4.1. Fisher's Exact Test.
 - A2.4.2. Sign Test.
 - A2.4.3. Wilcoxon Signed-Rank Test
 - A2.4.4. Kruskal-Wallis k-Samples Test
 - A2.4.5. Friedman Test.
 - A2.4.6. Cochran Q Test.
 - A2.4.7. Mac Nemar Test.
 - A2.4.8. Median Test
